

BMP Inspection - Weekly

Date: 2022-03-02 Time: 09:47 Date Rain Predicted to Occur: 2022-03-03 Predicted % Chance of Rain: 59 Total Rainfall:

Stormwater Sampling Agent: Neil Trenergy, Risk Consultant

WDID Number: 2 41C380307

Site Name: Highlands Builder: Nexgen Builders City: San Mateo Zip Code: 94401
Job Site Contact: Bob Pellegrine Company: Cervelliere Limited Job Site Phone: 650-445-0914

Rain Gauge

Rain gauge reading and location (in)

0.00

Site Information

Construction stage and completed activities

Landscaping

Approximate area of site that is exposed

Exemption Documentation

(explanation required if inspection could not be conducted)

Visual inspections are not required outside of business hours or during dangerous weather conditions such as flooding or electrical storms.

Observations

Good Housekeeping for Construction Materials

<input type="radio"/> Inventory of products (excluding materials designed to be outdoors)	Y	N	N/A
<input type="radio"/> Stockpiled construction materials not actively in use are covered and bermed	Y	N	N/A
<input type="radio"/> All chemicals are stored in watertight containers with appropriate secondary containment, or in a completely enclosed storage shed	Y	N	N/A
<input type="radio"/> Construction materials are minimally exposed to precipitation	Y	N	N/A
<input type="radio"/> BMPs preventing the off-site tracking of materials are implemented and properly effective	Y	N	N/A

Good Housekeeping for Waste Management

<input type="radio"/> Wash/rinse water and materials are prevented from being disposed into the storm drain system	Y	N	N/A
<input type="radio"/> Portable toilets are contained to prevent discharges of waste	Y	N	N/A
<input type="radio"/> Sanitation facilities are clean and with no apparent leaks or spills	Y	N	N/A
<input type="radio"/> Equipment is in place to cover waste disposal containers at the end of business day and during rain events	Y	N	N/A
<input type="radio"/> Discharges from waste disposal containers are prevented from discharging to the storm drain system / receiving water	Y	N	N/A
<input type="radio"/> Stockpiled waste material is securely protected from wind and rain if not actively in use	Y	N	N/A
<input type="radio"/> Procedures are in place for addressing hazardous and non-hazardous spills	Y	N	N/A
<input type="radio"/> Spill response in place	Y	N	N/A
<input type="radio"/> Equipment and materials for cleanup of spills is available onsite	Y	N	N/A
<input type="radio"/> Washout areas (e.g., concrete) are contained appropriately to prevent discharge or infiltration into the underlying soil	Y	N	N/A

Good Housekeeping for Vehicle Storage and Maintenance

<input type="radio"/> Measures are in place to prevent oil, grease, or fuel from leaking into the ground, storm drains, or mixing with surface waters	Y	N	N/A
<input type="radio"/> All equipment or vehicles are fueled, maintained, and stored in a designated area with appropriate BMPs	Y	N	N/A

Good Housekeeping for Landscape Materials

<input type="radio"/> Vehicle and equipment leaks are cleaned immediately and disposed of properly	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Stockpiled landscape materials such as mulches and topsoil are contained and covered when not actively in use	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Erodible landscape material has not been applied 2 days before a forecasted rain event or during an event	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Erodible landscape materials are applied at quantities and rates in accordance with manufacturer recommendations	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Bagged erodible landscape materials are stored on pallets and covered	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A

Good Housekeeping for Air Deposition of Site Materials

<input type="radio"/> Good housekeeping measures are implemented onsite to control the air deposition of site materials and from site operations	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
--	------------------------------------	-------------------------	---------------------------

Non-Stormwater Management

<input type="radio"/> Non-Stormwater discharges are properly controlled	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Vehicles are washed in a manner to prevent non-stormwater discharges to surface waters or drainage systems	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Streets are cleaned in a manner to prevent unauthorized non-stormwater discharges to surface waters or drainage systems.	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A

Erosion Controls

<input type="radio"/> Wind erosion controls are effectively implemented	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Effective soil cover is provided for disturbed areas inactive (i.e., not scheduled to be disturbed for 14 days) as well as finished slopes, open space, utility backfill, and completed lots	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> The use of plastic materials is limited in cases when a more sustainable, environmentally friendly alternative exists.	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A

Sediment Controls

<input type="radio"/> Perimeter controls are established and effective at controlling erosion and sediment discharges from the site	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Entrances and exits are stabilized to control erosion and sediment discharges from the site	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Sediment basins are properly maintained	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Linear sediment control along toe of slope, face of slope and at grade breaks	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A

Run-On and Run-Off Controls

Other

<input type="radio"/> Limit construction activity to and from site to entrances and exits that employ effective controls to prevent offsite tracking	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Ensure all storm, drain inlets and perimeter controls, runoff control BMPs and pollutants controls at entrances and exits are maintained and protected from activities that reduce their effectiveness	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Inspect all immediate access roads daily	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Run-on to the site is effectively managed and directed away from all disturbed areas.	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A
<input type="radio"/> Are the project SWPPP and BMP plan up to date, available on-site and being properly implemented?	<input checked="" type="radio"/> Y	<input type="radio"/> N	<input type="radio"/> N/A

Deficiencies Noted
